

ARPIT SHARMA

Nadaun, Hamirpur, HP | 9015399193 | arpit56665@gmail.com | linkedin.com/in/arpit-sharma-812624244

PROFESSIONAL SUMMARY

A motivated and well-organised Computer Science Engineering undergraduate with hands-on knowledge of cloud computing, networking, AI and cybersecurity fundamentals. Demonstrates excellent communication, teamwork, leadership and problem-solving skills gained through academic projects and extracurricular activities. Passionate about technology and committed to delivering quality work with a proactive and detail-oriented approach.

TECHNICAL SKILLS

IT Support & Troubleshooting: Hardware diagnostics (laptops, peripherals, printers), Software install & configuration, Performance & login issue resolution, End-user support

Operating Systems: Windows 10/11 (admin tasks, registry, services), Linux Ubuntu/Kali (terminal, file permissions, process management)

Networking: TCP/IP, DNS, DHCP | Wired & wireless setup, Network diagnostics & troubleshooting, Basic firewall configuration

User & Identity Management: Active Directory basics, User account creation, Password reset, Group policy concepts

Cloud Support: AWS EC2, S3, IAM, Cloud service troubleshooting, AWS Cloud Support Essentials certified

Databases: MySQL, MongoDB, Basic query writing and data lookup

AI Tools Proficiency: ChatGPT, Claude, GitHub Copilot — prompt engineering, AI-assisted troubleshooting, documentation and code generation

Documentation: Technical issue logging, Knowledge base writing, Escalation note preparation, SRS documents

PROJECTS AND INTERNSHIPS

1. Honeypot Security & System Monitoring System | Python · Flask · Paramiko · Pandas · Linux

Deployed a network monitoring system to capture and log all unauthorised access attempts on SSH and HTTP services — directly simulating real-world helpdesk incident logging and system health monitoring responsibilities.

Event Logging & Monitoring: Captured attacker IPs, credentials, commands, and timestamps in structured logs — mirrors helpdesk ticket and audit log management.

System Configuration: Configured Linux server ports, SSH daemon settings, and service listeners; applied OS hardening best practices.

Incident Documentation: Produced forensic-style incident reports for each attack session — demonstrates clarity in technical documentation.

Performance Diagnosis: Monitored system resource usage during active attack attempts and resolved service disruption events.

2. SHIKSHARTHEE — Web-Based E-Learning Platform | Intern Jan 2026 – Jun 2026

Built a full-stack Learning Management System (LMS) during a 6-month internship at Ziion Technology, providing centralized course management, content delivery, assignments, quizzes, and progress tracking.

Developed a responsive React.js frontend with role-based dashboards for students and instructors; implemented login/register, course listing, enrollment, and learning content display pages.

Engineered RESTful APIs using Node.js and Express.js for user authentication (JWT), course CRUD operations, assignment/quiz submission handling, and secure role-based access control.

Designed a MongoDB schema covering users, courses, assignments, quizzes, and progress records; integrated real-time analytics and calendar-based class scheduling features.

CERTIFICATIONS

AWS Cloud Support Essentials — Amazon Web Services | Cloud service troubleshooting, support operations, service health monitoring

AWS Cloud Technical Essentials — Amazon Web Services | EC2, S3, IAM, Lambda, VPC — cloud infrastructure fundamentals

Fundamentals of Information Security — Infosys | CIA triad, threat categories, risk management, access controls

PHP Web Development — CS Infotech | Server-side scripting, session management, MySQL integration

Machine Learning Essentials — TCIL-IT | Python, Pandas, data processing fundamentals

NEPTEL — Software Conceptual Design

EDUCATION

B.Tech – Computer Science Engineering | 2023–2026|Completed

Chandigarh Group of Colleges, Landran

Diploma – Computer Science Engineering | Completed

B.R. Ambedkar Govt Polytechnic, Ambota (Una)

Intermediate – CBSE | 2021 | 81.6%

T.R. D.A.V. Public School, Kangoo, Hamirpur

Matriculation – CBSE | 2019 | 65%

T.R. D.A.V. Public School, Kangoo, Hamirpur

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native)

Availability: Immediate joiner | Open to relocation

Interests: Cloud computing, datacenter operations, technical support, networking, IT Support
